✓ **750 HP**

40mm thick bottom housings shaped to fill the bottom of the trough for extra strength and protection

750Hp central gearbox with oil cooler

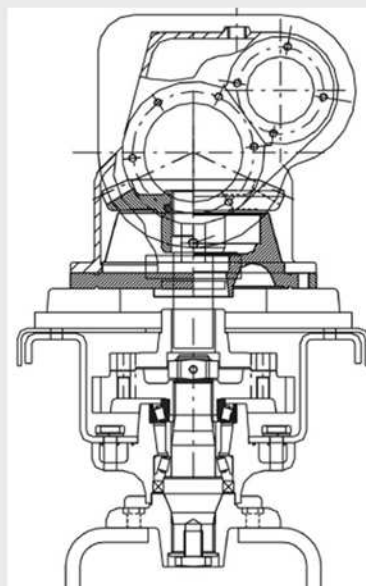

8mm thick trough

60mm shafts supported by high quality conical bearings protected by a bottom oil seal and mechanical labyrinth.

Splined blade holder bolted to the shaft with conical fitting

Levelling bar attached to the rear roller and independently adjustable

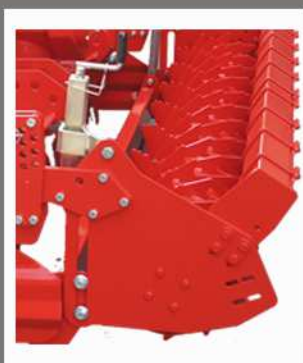

Reliable Quick Fit system. The tine socked guide is bolted to the blade holder therefore it can be replaced if damaged or worn. No need to replace the whole expensive rotor.
