GTS

With the GTS is possible to clear large quantities of pruning and branches up to 15cm with a medium size tractor available on the farm.

The 45cm hydraulic side shift, the 200mm anti shock rotor and the heavy duty 14mm thick chassis make the GTS the ideal machine for the olivegrowers.

QUICK HUB SYSTEM

In the event of a break down the entire assembly can be replaced in minutes.

The tailgate with the incorporated rear roller is lifted hydraulically leaving a clear access to the rotor. Large and tall piles of prunings or small trees can be reduced by reversing and finally reduced to small mulching driving forward with the tailgate closed.

MODELLO						
	kW	HP	cm	cm	nr	Kg
GTS 160	45-74	60-100	160	180x130x110	14	780
GTS 180	47-74	70-100	180	200x130x110	16	820
GTS 200	59-74	80-100	200	220x130x110	18	870
GTS 220	67-74	90-100	220	240x130x110	20	900
